

APPLICATION CATEGORY: FUND

Energy efficiency investments in buildings

Innovative services and business models aiming at addressing challenges for enhanced reliability and reduced risks of energy efficiency investments.

Challenges

- ◆ High risk of energy efficiency investments
- ◆ Lack of financial and energy domain integration
- ◆ No evidence-based solutions
- ◆ Lack of reliable and cost-effective analysis

Services

- ◆ Performance KPI calculation
- ◆ Energy Conservation Measures
- ◆ Energy saving measurement and verification
- ◆ Decision-making processes for financing energy efficiency refurbishments

Benefits

- 1 Increasing trust on Energy Performance Contracts
- 2 Cost-effective assessment of refurbishments
- 3 Reduce uncertainty of energy efficiency investments

Building Value Chain

Building owners
 Financiers (banks, local governments, private investors)
 DSOs
