

APPLICATION CATEGORY: POLICY

Policy making and policy impact Assessment in building sector

Innovative services for Sustainable Energy and Climate Action Plans (SECAPs), Energy Performance Certificates (EPC) and impact assessment of policies at all levels (city, regional, national, EU) for buildings.

Challenges

- ◆ Unreliable Energy Performance Certificates
- ◆ Regulatory barriers to renovation actions
- ◆ Reduced trust of the energy refurbishment market
- ◆ Inadequate budget allocation for energy efficiency investments

Services

- ◆ SECAPs decision-making support
- ◆ Energy Conservation Measures
- ◆ EPC harmonization and compliance
- ◆ National and EU policy impacts assessment and support

Benefits

- 1 Innovative pathways in energy and environmental policy
- 2 Insights provision for high impact sustainability actions
- 3 Improved EPC accuracy and reliability
- 4 Cost-effective Energy Performance Contracts
- 5 Decision-support in climate change mitigation and adaptation actions

Building Value Chain

Regional / National / EU governments
