Modular Big Data Applications for Holistic Energy Services in Buildings

## HOUSING RENOVATION PLANNER

## OBJECTIVES

- To offer a more accurate vision of the impact of policies related to renovation of housing
- To use generated data as input for policy making, including the revision of the Energy Efficiency Directive
- To inform the National Long-Term Renovation Strategies
- To argue for more accurate goals, targets, and milestones in relevant policies

## ANALYTICS SERVICES

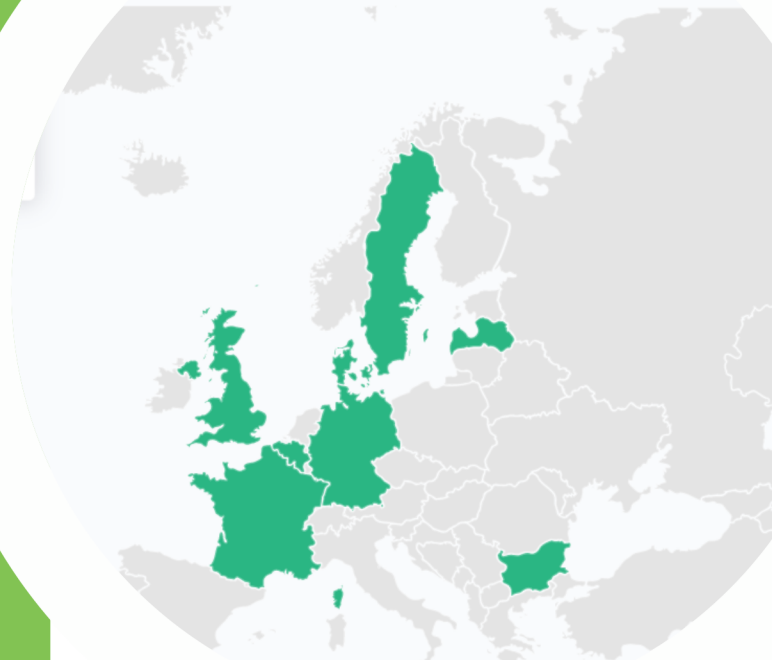

- Insights for optimal decisions on future building retrofiting
- Optimisation of fund allocation taking into account risk
- Impact assessment of renovation policies

## TARGET AUDIENCE

- Building owners
- Policy-makers (local, regional, national or European level)
- Investors

Europe with existing energy efficiency investments, in Buildings and Industry,

## BENEFITS

We help building owners plan their renovations and facilitate negotiations with potential investors.

We help building owners rank and choose energy efficiency measures by a selected set of criteria and other products that compare investments made and savings achieved.

We optimise the decision-making in planning renovations.

We provide policy makers with insights from past energy efficiency interventions. We improve reliability and accuracy of future impact assessments related to renovation policies.

We inform investors with decisions on green funding allocation.
